System manual

R180 Wireless Wind Speed Indicator

Windspeed in miles
and kilometers /hr

Accurate to 2/10ths

Limit settings

System Description:

The R180 wireless wind speed indicator provides the operator with constant measurement of wind speed at the crane boom tip. The sensor transmits wireless back to the cab mounted display. The display has adjustable limits the operator can set to warn of high wind conditions. The system is pre calibrated and easy to install. Cost effective solution for government job requirements for wind speed indication.

Wylie's been building crane indicators since 1933!

Uses internal antenna for maximum durability.

Lithium batteries for two year + life.

Reliable and easy to operate.

Pre-calibrated for fast installation.

1000 ft + range.

Accurate to 2/10 of mile / hour.
